

A Message To Our Dear North-American Brothers & Sisters!

Armino Augusto de Abreu

(Special for the MV-Brasil)

Are You, dear North-American brothers & sisters, still shocked and upset by these annoying images?

(domain organized by an US citizen)

We, Brazilians, are too!

INJURIES TO SOMEONE'S COUNTRY SYMBOLS ARE ALWAYS AGGRESSIVE AND HURT EVERYBODY!

For this reason, we understand and have been tolerant to your anger and indignation seeing our Organization symbol, the **MV-Brasil**, on the Internet inciting the Brazilian people to resist undesirable foreign aggression, pressure and influence.

We can also understand the irresistible desire you have certainly felt, of making it disappear from the Internet. We have already felt the same way, long before you!

But we have never thought of doing that **at all costs**.

We usually counteract like our aggressors although we have never used **electronic piracy** or **blackmail**, which happened to our Home Page and our Organization.

We accept, of course, your unquestionable right to feel offended every time you realize that countries, groups or people are offending or attacking the United States of America just for hate. We will always feel solidarity if it happens.

But this has never been our intention!

We have been feeling offended for a long time, and we are annoyed about the systematic, untrue and aggressive campaigns against Brazil, as the ones pictured above, coming from the anti-nationalists of the world, mainly from your country, in spite of being sure they do not come from polite American people. They surely hide

very specific interests of some bad persons or groups, hidden among the mostly good American citizens!

As these campaigns have been extremely cruel and unfair, increasing our people's problems, suffering and poverty, we have adopted the motto that reflects one of our most beautiful and historical traditions, an act of great courage:

Resisting is necessary, GOD bless BRASIL!!!

This unforgettable tradition of bravery and combativeness was inspired and legated by our ancestors from the ancient Portuguese Colonies of Bahia and Pernambuco, in the 17th century, when "trade pirates", "shareholders thugs" of the Dutch Western India Company (a private enterprise disguised under the Dutch flag and protected by mercenary troops led by Admiral Mauricio de Nassau) were sent out of our lands of Salvador, Recife and Olinda.

Not coincidently, the very same "pirates" who had escaped from Brazil, scared and defeated, settled in the northern part of the continent, in the lands of Spain.

There, they deceived native American Indians and, in exchange for trinkets, stole their land (currently the Island of Manhattan) turning this place into an ultimate trading site where they could exercise their hidden and devastating power. Firstly, they built a trading branch of this Dutch Western India Company, named New Amsterdam.

After moving their headquarters from Holland to England, where the monster's brains have been living up to now, they decided to change the name of the new world colony from New Amsterdam to New York, where they have been hiding under the American flag.

From there, they still besiege the Brazilian people, trying to overcome their unforgettable failure in this country.

We have already beaten them twice in the past. We will beat them again now or in the future, whenever necessary.

We admire the progress and the way of life of your country very much. However we would never accept to exchange our independence, as you did, for a plate of lentils.

Therefore we have adopted an unchangeable guideline:

We will always counteract!

We have worked very hard in defense of this essential principle and some other genuine national interest: to get fairer rules in trading and in international relations; to preach against the overwhelming foreign cultural invasion that destroys and influences our most precious behavioral, historical, idiomatic and social traditions; to prestige and divulge, in this country and out of it, our people's deeds, qualities and competence in order to stimulate, reward creativeness and raise Brazilian people's self-esteem.

In the **MV-Brasil** conception, the loss or the change of our national identity on behalf of an alien culture and existential ideology **will not be a historical fatality**, as long as we have the right, opportunity and ways of looking for a dignified and independent existence: **our own way!**

This is the reason for having our Symbol and Home Page on the Internet.

They do not have the intention or the power to harm anyone. They do not kill; they do not explode over anybody's head nor spill innocent blood.

They only warn our people and whoever else is at our side, not to surrender nor give in without fighting against what corrupted officials and their world allies (under powerful and hidden forces that instruct them behind the scene in spite of people's good nature and wishes) secretly preach or simply try to impose.

So, once we have explained our patriotic proposal, we would like to cry out to the American people and ask them not to give in to this cruel oppression nor the blackmail from the **"Materialistic Supranational State"** whose terrible face comes from the shadows, day after day, revealing itself, at last, nor to all the malignity and destruction that is hidden in its soul.

We denounce this Machiavellian, terrible and agnostic mechanism, infiltrated into the power system that runs the United States of America and all western countries, that corrupts all the system and steals it from their legitimate owner: **THE PEOPLE**.

And the monster, insatiable, uses it to dominate and impose its strong and cruel will to people and countries seeking for absolute materialistic gains and absurd profits without caring for humanity's future, which it despises and outrages.

We have been researching these evil actions and its bad intentions, denouncing them in beautiful texts written by famous and dignified Brazilians. Try to read them through these pages and find the terrible truths they tell!

These texts should be available, today, to the Brazilians and to all oppressed and deceived people, including you, our North American brothers and sisters. However they have disappeared from the Internet temporarily, we hope, due to an unreflected and hurried action,

supposedly patriotic, by some of you, who took over our Title and Address on the Internet.

We can assure you that only some important **instruments** of our organization were taken from us, but not its **blood** and **soul**; and our **will** and **ideal will never be**. **We will keep on fighting!**

Be sure that instead of benefiting the United States of America and teaching us a lesson, this juvenile attitude has just **‘set more fire on the hidden forces’** that suffocate freedom and democracy on behalf of money profit and humanity contempt.

Do not forget that if they settled on the island, from the 17th century on, taking all evil and exploitation they are capable of in their hearts (giving the United States of America a solid and prosperous look), they did not do it for free, nor for altruistic reasons. They did it to satisfy their own interest, please their needs of acting in the shadows, in a prosperous, calm and safe environment.

They have just offered you, as a kind of compensation and pay, the very smallest part of the wealth they have accumulated to the cost of your huge potential, your children’s blood, the fantastic financial debt imposed to the American people, and to the enormous poverty of others, which has just increased their power and profit all over the world.

But we hope you pay a lot of attention to it, a brother’s advice:

If they are exploiting you today, without any consideration, despising all goodness, brotherhood, and spirit of solidarity, which are important features of our Jewish-Christian culture, it is because we noticed their intention a long time ago and expelled them vigorously, **kicking their asses!**

Therefore we advise you to do the same, **as soon as possible!**

Armando Abreu

And we hope to have your kind comprehension if, unwillingly, we seemed to be very aggressive and unfair, before you had the chance of knowing our ideas and proposals quite well.

Now that you have been introduced to our real intention, **we also hope** that you'll return our Domain and join us in this difficult fight on behalf of true democracy, freedom of speech and humanity's dignity.

Yours, Sincerely

"Council of the 12"

MV-BRASIL.
